Spitfire series

Versatility and innovation are not at odds with the best boutique tones. Spitfire is certainly the most versatile handmade head with the biggest personality on the market.

Two independent channels, two master volumes, two gain modes and three presence modes. It is a great presentation for an amplifier that, with 20W or 50W of tube power, astonishes even the most demanding guitarists. Available in Head and Combo versions, Spitfire is your best choice for touring, rehearsing or simply getting the best of your tones.

Our careful design of the interaction between preamp and power amp allows to easily controlling the amount and character of the saturation that we want at any moment. An exclusive exterior design with the best materials completes our flagship product in the world of amplification.

Flexicab 4x12

Born to stand out. Flexicab is the most versatile 4x12" cabinet with the best sound. Its double rear panel will let you configure it closed or semi-open, allowing you to adapt Flexicab perfectly to your tone.

Our careful selection of solid hardwoods joined with cylindrical dovetail, makes your sound massive, with deep bass, defined mids and singing treble, accurately reproducing the entire frequency range of your guitar and amplifier.

FEATURES

- ⚡ Jensen Electric Lightning Speakers.
- ⚡ Angled configuration for maximum sound spread.
- ⚡ Reinforcement inner arm for perfect resonance.
- ⚡ Solid wood with cylindrical dovetailed joints.
- ⚡ Synthetic leather lining, sewn by hand and built in one piece. **Custom colour options available.**

Gasoline

Can you imagine the ultimate tool that transforms any guitar and amplifier into a Rock and Metal machine? Stop imagining. Here's Gasoline.

Gasoline is the tool that will make you set aside all your old distortion effects and preamps. Genuine American High Gain boutique sound with unprecedented versatility and tons of gain, made to reach every style from rock to the most extreme metal.

Satisfying the most exquisite ears, Gasoline is built by hand one by one using the highest quality components and adjusting each gain stage, so that the sound is perfect in every unit.

FEATURES

- ⚡ True Bypass.
- ⚡ Possibility of using as effect or preamplifier.
- ⚡ Anodized metal printing for maximum durability.
- ⚡ Wired, soldered and built by hand according to our quality standards.

SE² STUDIO ENVIRONMENT EMULATION

Equipped with SE² technology, our pedals can be used to record through any audio interface. Just open your favorite DAW and load our exclusively designed impulse responses, to turn them into a multitude of amplifiers, cabinets and mic configurations, that will take your recordings to the next level.

Heartbreaker

Squeeze the best British blues and rock tones out of any Amp with Heartbreaker. Dynamics, crunch and delicious overdrive in the ultimate preamplifier for classic sound lovers.

Heartbreaker is a versatile tool that will turn any amplifier into a roaring rock and blues machine with the best classic British sound. Authentic boutique tone packed with two gains, dynamic and compressed, that will get that tone that you've been looking for so many years.

Satisfying even the most exquisite ears, Heartbreaker is built one by one using high quality components and adjusting each gain stage, so the sound is optimal in every unit.
